

Physical Science 303 – Homework 2 Rubric

Unit III Problems and Exercises 1 - 12

I assumed everyone read the Chapter 11 and 12 and Unit III. Each student received credit for # 1 and # 2, which accounts for two-thirds of the homework points (40 out of 60).

For Problems 2, 3, 8, 9, 12:

Graded item	Point Value
Answer's value	1 pt
Correct number of significant figures	1 pt
Units	1 pt
Work shown and explained	1 pt

Comment Legend:

Comment X: The answer's value is wrong or you are missing part of the question.

Comment A: The answer has too few or too many significant figures.

Comment B: The answer has no units or the wrong units.

Comment C: Solution of problem not clearly explained. Words are needed to explain your work.

Every X, A, B, or C comment left is one point off.
